Bro-Tex Presents New Dual Textured Wipes

Tough on build-up, gentle on equipment

Bro-Tex is launching a new dual textured wipe in September, 2017. The wipe has exceptional wet and dry strength. The durable fiber weave holds strong for all day use.

Dual texture towels are a great option when you need to gently scrub away build-up without damaging underlying surfaces. Use to remove contaminants such as biofilm, milkstone and carbon. The disposable towel can be thrown away at the end of the day to prevent cross-contamination. The towels are kosher and allergen-free, perfect for production lines and food packaging.

For industrial cleaning, the aperture texture is great to trap debris such as grease, dirt and other impurities. The coarse texture side of the towels will not damage underlying surfaces so they are a great option for metal equipment or tables. The other side is smooth for polishing.

The new wipe is ideal for use on stainless steel for everything from equipment to elevators. Our textured wipes are perfect for removing fingerprints and smudges. These low lint wipes will leave a streak-free shine without leaving behind residue.
